JPS Techno Chem

Vision

JPS Techno Chem shall strive to be the leader in segments it's present by focusing on R&D so as to offer cost effective, environment friendly and internationally accepted film coating system.

Mission

JPS Techno Chem offers its expertise and facilities in the development, production and supply of pharmaceuticals to demanding customers for global use.

Quality Policy

We delight customers with world class products as per international standard or specially as per customer specification at competitive price.

Company:

JPS Techno Chem, is a young dynamic technology driven organization engaged in the business of research, manufacturing and marketing of value-added speciality products for the pharmaceuticals, nutraceuticals, veterinary, herbal & ayurvedic Industry. We are committed to on time supply and consistent quality. We have our head office at Ahmedabad one of the most important industrial center in the western part of India.

We believe that people make all difference to products and processes, for our people represent the intellectual capital we possess. We have been successful in attracting, retaining, training and empowering the best of talent. A highly qualified and motivated team of professionals looks after different aspects of the company. An equal opportunity employer, we have created an atmosphere that encourages merit and values knowledge, hard work and commitment.

Our customers can be assured that the raw material chosen for use in our formulations are specified to meet or exceed current domestic and/or international regulatory standards.

We provide technical assistance to our customers for new product development as well as after sales standardization of the process & trouble shooting at the customer's site.

We offers a variety of ingredients for the pharmaceutical industry with a strong focus on excipients that result in reliable, consistent, and effective products. This includes biodegradable excipients derived from biobased resources such as cellulose or sucrose. Our products are made in highly controlled and reproducible processes with dedicated equipment, resulting in minimal batch-to-batch variations. This means your formulations will perform and behave the same over time.

Solubilizer

- JPSOL K 140
(Polyoxyl 40 Hydrogenated Caster Oil)
- JPSOL K 150
- Polysorbate 80 Powder

Ready Granules

- Lactose
- M.C.C.
- Lactose + M.C.C.
- For Chewable Tablet
- For Effervescent Tablet

JPS SR Blend

- Metformin
- Diclofenac Sodium
- Aceclofenac
- Nifedipine
- Tranaxamic Acid
- Theophylline.....and customized

JPS DZO (Improve dissolution)

- Telmisartan
- Rosuvastatin
- Glimepride
- Vildagliptin
- Sitagliptin
- Chlorthiozide
- Albendazole

JPS Coat – All type of Pre-mix tablet coating materials

- Film Coating
- Enteric Coating
- Moisture Barrier Coating
- Flavored Coating
- Pearl Coating
- Glossy Shine Coating

N.P.Seeds / Sugar Sphere

Carbomers & Polymers

- Carbomer 940 / 980
- Carbomer 934 /974
- Carbomer 971 / 971P As Per Requirement of Customer.
- L 100 Methacrylic Acid Co-Polymer Type "A"
- S 100 Methacrylic Acid Co-Polymer Type "B"
- L 100-55 Methacrylic Acid Co-Polymer Type "C"

S.R. Ready to Compress Granules

- Metformin 76% SR Granules
- Diclofenac Sodium 66% SR Granules
- Aceclofenac 66% SR Granules
